INDEX TO VOLUME 12—1977

Index to Authors and Contributors

AJOVALASIT, A. *Communication* New analysis of holophotoelastic patterns and their application, 163
AL-HASSANI, S. T. S. *Paper* Inextensional collapse of thin-walled tubes under axial compression, 317
ATKINS, A. G. *Communication* Quasistatic cracking of polymers with residual stresses, 165

BEALES, C. *Paper* Residual stresses and distortions measured during construction of the Milford Haven bridge, 123
BOUTLE, N. F. *Corrigenda* Crack closure at positive stresses during random load fatigue crack growth, 70
BRANCO, C. M. *Paper* Elastic-plastic fatigue crack growth under load cycling, 71

CARTWRIGHT, D. J. *Book* Compendium of stress intensity factors, 67
CHAKRABARTI, B. *Paper* Torsional buckling at the limit state of collapse in braced multi-storey I-section steel column design, 233
CHOW, C. L. *Communication* Quasistatic cracking of polymers with residual stresses, 166. *Papers* Crack propagation with quasistatic energy analysis, 45. (*Corrigenda* 251); Fracture studies of point-loaded centre-cracked plates, 286
CLARKE, J. D. *Paper* Measurement of residual stresses and distortions in stiffened panels, 107
COENEN, J. *Communication* New analysis of holophotoelastic patterns and their application, 163
CULLINGTON, D. W. *Paper* Residual stresses and distortions measured during construction of the Milford Haven bridge, 123
CULVER, L. E. *Paper* Elastic-plastic fatigue crack growth under load cycling, 71
CUSENS, A. R. *Book* Bridge deck analysis, 67

DANESHI, G. H. *Paper* Pressure distribution and bulging profiles during compression of non-circular prismatic blocks between parallel frictional platens, 310
DEMUNSHI, G. *Paper* Stress concentration factors around the intersection of two cylindrical holes in an infinite elastic body, 217
DÖLLE, H. *Paper* X-ray stress measurement on steels having preferred-orientation, 62
DOVER, W. D. *Corrigenda* Crack closure at positive stresses during random load fatigue crack growth, 70
DWIGHT, J. B. *Paper* Shrinkage stresses in a thin plate with a central weld, 140

EBBENI, J. *Communication* New analysis of holophotoelastic patterns and their application, 163
ELLIS, L. G. *Paper* A statistical appraisal of the measured deformations in several steel box girder bridges, 97
ELLISON, E. G. *Paper* The use of the C^* parameter in predicting creep crack propagation rates, 167
EVANS, W. T. *Communication* Limitations of the Westergaard equations for experimental evaluation of stress intensity factors, 349. *Paper* A comparison of finite-element and experimental studies on plane stress crack geometries, 208

FAULKNER, D. *Paper* Effects of residual stresses on the ductile strength of plane welded grillages and of ring stiffened cylinders, 130
FESSLER, H. *Book review* The significance of fatigue, 252. *Papers* Leakage characteristics of flanged pipe joints, 29 (*Corrigenda* 251); Stationary creep prediction from model tests using reference stresses, 271
FOSTER, C. G. *Communication* Strain distribution and elastic-constant measurement using holographic and speckle-pattern interferometry, 163

GARDINER, T. *Paper* High-temperature cumulative damage for stage I crack growth, 253
GDOUTOS, E. E. *Communication* Limitations of the Westergaard equations for experimental evaluations of stress intensity factors, 349
GOODMAN, R. A. *Paper* Allowance for imperfections in ship structural design, 153
GURNEY, T. R. *Papers* Influence of overlays on stresses in fillet-welded joints, 16; Some finite-element stress analyses of simulated diffusion-bonded lap joints, 331

HARPER, M. P. *Paper* The use of the C^* parameter in predicting creep crack propagation rates, 167
HARRIS, W. J. *Book* The significance of fatigue, 252
HAUK, V. *Paper* X-ray stress measurement on steels having preferred-orientation, 62
HERMANNE, A. *Communication* New analysis of holophotoelastic patterns and their application, 163
HOOKE, C. J. *Paper* Stress concentration factors around the intersection of two cylindrical holes in an infinite elastic body, 217
HOPPER, C. D. *Paper* Fatigue crack propagation in biaxial stress fields, 23
HUGHES, J. F. *Paper* Radial loading of a cylindrical shell through plate brackets, 197
HYDE, T. H. *Paper* Stationary creep prediction from model tests using reference stresses, 271

JOHNSON, W. *Paper* Inextensional collapse of thin-walled tubes under axial compression, 317
JONES, R. *Communication* Strain distribution and elastic-constant measurement using holographic and speckle-pattern interferometry, 163

KAMTEKAR, A. G. *Paper* Shrinkage stresses in a thin plate with a central weld, 140
KATO, A. *Paper* Stress concentration factors of shallow grooves in torsion, 41
KENDRICK, S. B. *Paper* Shape imperfections in cylinders and spheres: their importance in design and methods of measurement, 117
KITCHING, R. *Paper* Radial loading of a cylindrical shell through plate brackets, 197
KOCKELMANN, H. *Paper* X-ray stress measurement on steels having preferred-orientation, 62

LAU, K. J. *Paper* Fracture studies of point-loaded centre-cracked plates, 286
LEE, G. M. C. *Paper* The influence of mean stress on fatigue crack propagation in a quenched and tempered alloy steel, 81
LIGHT, M. F. *Papers* A comparison of finite-element and experimental studies on plane stress crack geometries, 208. Crack extension forces in elasto-plastic stress fields, 305. A numerical investigation of post-yield fracture, 293
LIGHTFOOT, E. *Book review* Bridge deck analysis, 67
LUXMOORE, A. R. *Communication* Limitations of the Westergaard equations for experimental evaluations of stress intensity factors, 349. *Papers* A comparison of finite-element and experimental studies on plane stress crack geometries, 208. Crack extension forces in elasto-plastic stress fields, 305. A numerical investigation of post-yield fracture, 293

MAI, Y. W. *Communication* Quasistatic cracking of polymers with residual stresses, 165
MALIK, Z. *Paper* Ovalization of cylindrical tanks as a result of foundation settlement, 339
MEHROTRA, C. L. *Papers* On non-uniform illumination in a lens polariscope and remedies, 180. Replacement of quarter-wave plates by photographic double exposure for controlled density evaluation, 185
MEYER, M. L. *Book review* Computing developments in experimental and numerical stress analysis, 68. *Paper* Replacement of quarter-wave plates by photographic double exposure for controlled density evaluation, 185
MILLER, K. J. *Papers* Cumulative damage laws for fatigue crack initiation and stage I propagation, 262. Fatigue crack propagation in biaxial stress fields, 23. High-temperature cumulative damage for stage I crack growth, 253
MORTON, J. *Paper* Ovalization of cylindrical tanks as a result of foundation settlement, 339

MOWATT, G. A. *Paper* Allowance for imperfections in ship structural design, 153

NGAN, K. M. *Communication* Quasistatic cracking of polymers with residual stresses, 166. *Paper* Crack propagation with quasistatic energy analyses, 45. *Corrigenda* 251

OKAMOTO, M. *Paper* Comparisons between mechanical analogue and experimental measurements for thermal stresses in two dimensions, 37
OKUBO, H. *Paper* Stress concentration factors of shallow grooves in torsion, 41
OLLERTON, E. *Book review* Progress in experimental mechanics, 66. *Paper* Thin annular plates having an inner clamp carrying bending moments, 192

PAMA, R. P. *Book* Bridge deck analysis, 67
PARKS, V. J. *Book* Progress in experimental mechanics, 66
PATTABIRAMAN, J. *Paper* Stresses around a small circular cutout in a cylindrical shell subjected to asymmetric bending, 53
PERRY, D. A. *Paper* Leakage characteristics of flanged pipe joints, 29 *Corrigenda* 551

RADON, J. C. *Paper* Elastic-plastic fatigue crack growth under load cycling, 71
RAMAMURTI, V. *Paper* Stresses around a small circular cutout in a cylindrical shell subjected to asymmetric bending, 53
RAZ, S. A. *Book* Analytical methods in structural engineering, 66
RAZEM, C. *Paper* Deformed boundaries determined by the method of caustics, 223
REDSHAW, S. C. *Book review* Analytical methods in structural engineering, 66
ROOKE, D. P. *Book* Compendium of stress intensity factors, 67
RUIZ, C. *Paper* Ovalization of cylindrical tanks as a result of foundation settlement, 339

SAEDI, F. *Paper* Radial loading of a cylindrical shell through plate brackets, 197
SEKIYA, T. *Paper* Comparisons between mechanical analogue and experimental measurements for thermal stresses in two dimensions, 37
SESEMANN, H. *Paper* X-ray stress measurement on steels having preferred-orientation, 62
SODEN, P. D. *Paper* Inextensional collapse of thin-walled tubes under axial compression, 317
SOMERVILLE, W. L. *Paper* Measurement of residual stresses and distortions in stiffened panels, 107
SPENCE, J. *Papers* Type 1 energy analysis for the creep of smooth circular pipe bends under combined in-plane bending and internal pressure, 1. Type 2 energy and bound analyses for the creep of smooth circular pipe bends under combined in-plane bending and internal pressure, 8
STANLEY, P. *Book* Computing developments in experimental and numerical stress analysis, 68
SUMI, S. *Paper* Comparisons between mechanical analogue and experimental measurements for thermal stresses in two dimensions, 37
SWAN, J. W. *Paper* Measurement of residual stresses and distortions in stiffened panels, 107

THEOCARIS, P. S. *Communication* Limitations of the Westergaard equations for experimental evaluations of stress intensity factors, 349. *Paper* Deformed boundaries determined by the method of caustics, 223
THOMPSON, J. D. *Paper* Control of distortion due to welding and the additional cost involved, 148
TURNER, C. E. *Book review* Compendium of stress intensity factors, 67
TURVEY, G. J. *Paper* Biaxial buckling of moderately thick laminated plates, 89

WADE, E. H. R. *Paper* The influence of mean stress on fatigue crack propagation in a quenched and tempered alloy steel, 81
WEBSTER, J. J. *Paper* Stationary creep prediction from model tests using reference stresses, 271
WHITE, J. D. *Paper* Shrinkage stresses in a thin plate with a central weld, 140
WOOD, R. H. *Paper* Torsional buckling at the limit state of collapse in braced multi-storey I-section steel column design, 233

ZACHARIAH, K. P. *Paper* Cumulative damage laws for fatigue crack initiation and stage I propagation, 262

Subject Index

Accelerometer, miniature low-impedance, *Product review*, 351
ALLOWANCE FOR IMPERFECTIONS IN SHIP STRUCTURAL DESIGN, *Paper*, 153
Analytical methods in structural engineering, *Book*, 66

Beam theory, non-linear, 79
Bending moments in clamped thin annular plate, 192
Bending of ring-frames, 130
Bending stresses around cutouts in shells, 53
Bending stresses in pipe bends, 6
BIAXIAL BUCKLING OF MODERATELY THICK LAMINATED PLATES, *Paper*, 89
Bridge decks, analysis of, *Book*, 67
Bridges, deformations in steel box girder, 97
Bridges, Milford Haven, residual stresses and distortions in, 123
Buckling collapse of flat plated grillages and ring-stiffened cylinders, 130
Buckling-load vs plate-thickness-ratio curves, 89
Buckling of laminated plates, 89
Buckling of ring frame, 138
Buckling, strength and stiffness effects in, 135
Buckling, torsional, in multi-storey column design, 233
Bulging profiles for compression of non-circular prismatic blocks, 310

Capability simulation in ship structural design, 155
Caustics formed by deformable boundaries, 223
Caustics, method of, 223
Chord gauge measurement of shape, 118–22
Cold-cambering, 130, 132
Collapse mechanisms, formation of folds, 323
Collapse mechanisms involving stationary hinges, 317
Collapse mechanisms involving travelling hinges, 323
Collapse modes for axial compression of thin-walled tubes, 317
Collocation method of successive approximations, 223
Column design, braced multi-storey I-section, 233
Column design, variable stiffness method of, 233
COMPARISON OF FINITE-ELEMENT AND EXPERIMENTAL STUDIES ON PLANE STRESS CRACK GEOMETRIES, *Paper*, 208
COMPARISONS BETWEEN MECHANICAL ANALOGUE AND EXPERIMENTAL MEASUREMENTS FOR THERMAL STRESSES IN TWO DIMENSIONS, *Paper*, 37
Compendium of stress intensity factors, *Book*, 67
Compression, axial, of thin-walled tubes, 317
Compression of non-circular prismatic blocks, 310
Computing developments in experimental and numerical stress analysis, *Book*, 68
CONTROL OF DISTORTION DUE TO WELDING AND THE ADDITIONAL COST INVOLVED, *Paper*, 148
C^* parameter for prediction of creep crack propagation rates, 167
CRACK CLOSURE AT POSITIVE STRESSES DURING RANDOM LOAD FATIGUE CRACK GROWTH, *Corrigenda*, 70
Crack extension, energy balance for, 306
CRACK EXTENSION FORCES IN ELASTO-PLASTIC STRESS FIELDS, *Paper*, 305
Crack extension, numerical model for, 306
Crack growth, high-temperature cumulative damage for stage I, 253
Crack propagation stability in point-loaded, centre-cracked plates, 286

CRACK PROPAGATION WITH QUASISTATIC ENERGY ANALYSIS, *Paper*, 45; *Corrigenda*, 251
Crack tip opening displacement tests, 208
Crack tunnelling effect, 85
Cracks, fatigue. *See* Fatigue crack
Cracks, stress fields around, 293
Creep and initial deformations of components and their material uniaxial data, 282
Creep crack propagation rates, C^* parameter for prediction of, 167
Creep of pipe bends, deformation bound analyses for, 12
Creep of pipe bends, energy analysis for, 1, 8
Creep prediction from model tests using reference stresses, 271
CUMULATIVE DAMAGE LAWS FOR FATIGUE CRACK INITIATION AND STAGE I PROPAGATION, *Paper*, 262
Cutouts in shells, stress concentration around, 53
Cylinders, ring stiffened, effects of residual stresses on, 130
Cylinders, shape imperfections in, 117
Cylindrical holes, stress distribution around, 217
Cylindrical shell under radial load applied through plate brackets, 197
Cylindrical shells, inextensional deformation of, 346

Deformation bound analyses for creep of pipe bends, 12
Deformation zones for compression of non-circular prismatic blocks, 310
Deformations in steel box girder bridges, 97
DEFORMED BOUNDARIES DETERMINED BY THE METHOD OF CAUSTICS, *Paper*, 223
Diffusion-bonded lap joints, stress analysis of, 331
Distortion, cost of elimination or partial elimination, 150
Distortion due to welding, 148
Distortions in Milford Haven bridge, 123
Distortions in stiffened panels, 107

EFFECTS OF RESIDUAL STRESSES ON THE DUCTILE STRENGTH OF PLANE WELDED GRILLAGES AND OF RING STIFFENED CYLINDERS, *Paper*, 130
ELASTIC-PLASTIC FATIGUE CRACK GROWTH UNDER LOAD CYCLING, *Paper*, 71
Energy analysis for creep of pipe bends, 1, 8
Energy analysis, quasistatic, of crack propagation, 45
Energy balance for crack extension, 306
Experimental mechanics, progress in, *Book*, 66

Fatigue crack growth, stage I, 262
Fatigue crack growth under load cycling, 71
Fatigue crack initiation and stage I propagation, cumulative damage laws for, 262
FATIGUE CRACK PROPAGATION IN BIAXIAL STRESS FIELDS, *Paper*, 23
Fatigue crack propagation in quenched and tempered alloy steel, 81
Fatigue damage, high-temperature cumulative, for stage I crack growth, 253
Fatigue, significance of, *Book*, 252
Finite-difference analysis of shrinkage stresses, 142
Finite-element analysis, plane stress crack geometries, 208
Finite-element analysis, stresses in welded joints, 16
Finite-element methods, crack extension forces, 305
Finite-element methods, diffusion-bonded lap joints, 331
Finite-element methods, stress fields around cracks, 293
Flanged pipe joints, leakage characteristics of, 29
Flexibility factors, pipe bends, 3, 10
Flow lines for compression of non-circular prismatic sections, 310
Forming actions on residual or locked-in stresses, 132
Forming, residual stresses during, 130
Foundation settlement effect on ovalization of storage tanks, 339
Fracture mechanics, linear elastic, 71
Fracture, post-yield, 293
FRACTURE STUDIES OF POINT-LOADED CENTRE-CRACKED PLATES, *Paper*, 286
Fracture toughness, quasistatic energy determination, 288
Fracture toughness under multiple loading system, 49

Girders, steel box, deformations in bridges, 97
Grillage instability, failure due to, 136
Grillages, compression strength of, 135
Grillages, ductile strength of plane welded, effects of residual stresses on, 130

HIGH-TEMPERATURE CUMULATIVE DAMAGE FOR STAGE I CRACK GROWTH, *Paper*, 253
Holes, cylindrical, stress distribution around, 217

INEXTENSIONAL COLLAPSE OF THIN-WALLED TUBES UNDER AXIAL COMPRESSION, *Paper*, 317
INFLUENCE OF MEAN STRESS ON FATIGUE CRACK PROPAGATION IN A QUENCHED AND TEMPERED ALLOY STEEL, *Paper*, 81
INFLUENCE OF OVERLAYS ON STRESSES IN FILLET-WELDED JOINTS, *Paper*, 16

J-integral as fracture parameter, 305
J-integral as measure of strain concentration around notch tip, 293
J-integral, experimental evaluation of, 294
J-integral, numerical evaluation of, 293
J-integral, three-dimensional analysis, 300
Joint Committee on Fully-Rigid Multi-Storey Steel Frames, 233

Laminated plates, buckling of, 89
Lap joints, diffusion-bonded, stress analysis of, 331
Lap joints with square-ended plates, 334
Lap joints with tapered end plates, 336
LEAKAGE CHARACTERISTICS OF FLANGED PIPE JOINTS, *Paper*, 29; *Corrigenda*, 251
Limitations of the Westergaard equations for experimental evaluations of stress intensity factors, *Communications*, 349
Lloyd's Register of Shipping quality standards in ship plating, 153
Load cells, Strainsert universal flat load, *Product review*, 351
Load-deformation behaviour of thin plate crack specimens, 208
Load-displacement relationship, P–u–A diagrams, 46, 47
Load distributions determined by pseudocaustics, 227

MEASUREMENT OF RESIDUAL STRESSES AND DISTORTIONS IN STIFFENED PANELS, *Paper*, 107
Mechanical analogue procedure for thermal stresses, 37
Merrison Interim Design Rules, 97
Merrison Rules, 123
Milford Haven bridge, residual stresses and distortions in, 123
Model tests on ovalization of storage tanks, 342
Model tests using reference stresses, creep prediction from, 271
Multi-Storey Steel Frames, Full-Rigid, Joint Committee on, 233

New analysis of holophotoelastic patterns and their application, *Communications*, 163
Notch tip, J-integral as measure of strain concentration around, 293
NUMERICAL INVESTIGATION OF POST-YIELD FRACTURE, *Paper*, 293

ON NON-UNIFORM ILLUMINATION IN A LENS POLARISCOPE AND REMEDIES, *Paper*, 180
OVALIZATION OF CYLINDRICAL TANKS AS A RESULT OF FOUNDATION SETTLEMENT, *Paper*, 339
Overlay effect on stresses in welded joints, 16

Pipe bends, deformation bound analyses for creep of, 12
Pipe bends, energy analysis for creep of, 1, 8
Pipe joints, flanged, leakage characteristics of, 29
Plate brackets, cylindrical shell under radial load applied through, 197
Plate panel measurements in steel box girder bridges, 98
Plates, laminated, buckling of, 89
Plates, point-loaded centre-cracked, fracture studies of, 286
Plates, shrinkage stresses with central weld, 140
Plates, thin annular, having an inner clamp carrying bending moments, 192
Polariscope, attachment for vertical bend, *Product review*, 351
Polariscope, error analysis for double exposure, 190
Polariscope, non-uniform illumination, 180
Polariscope, replacement of quarter-wave plates by photographic double exposure for controlled density evaluation, 185
Polariscope, semi-diffused light, 183
Potential function U^*, 168
Potential function U^*, derivation of, 177
Preferred-orientation, stress measurement on steels having, 62
PRESSURE DISTRIBUTION AND BULGING PROFILES DURING COMPRESSION OF NON-CIRCULAR PRISMATIC BLOCKS BETWEEN PARALLEL FRICTIONAL PLATENS, *Paper*, 310

Pressure distribution for compression of non-circular prismatic blocks, 313
Progress in experimental mechanics, *Book*, 66
Pseudocaustics, load distributions determined by, 227

Quality standards in ship plating, 153
Quasistatic cracking of polymers with residual stresses, *Communications*, 165

RADIAL LOADING OF A CYLINDRICAL SHELL THROUGH PLATE BRACKETS, *Paper* 197
Reference stresses, creep prediction from model tests using, 271
Reliability analysis of ship structural design, 153
Reliability assessment in ship structural design, 155
Reliability model to assess allowable imperfections, 157
REPLACEMENT OF QUARTER-WAVE PLATES BY PHOTOGRAPHIC DOUBLE EXPOSURE FOR CONTROLLED DENSITY EVALUATION, *Paper*, 185
RESIDUAL STRESSES AND DISTORTIONS MEASURED DURING CONSTRUCTION OF THE MILFORD HAVEN BRIDGE, *Paper*, 123
Residual stresses, effect on ductile strength of plane welded grillages and of ring stiffened cylinders, 130
Residual stresses in Milford Haven bridge, 123
Residual stresses in stiffened panels, 107
Residual stresses in weld shrinkage, 140
Ring-frames, bending of, 130

Shafts under torsion, stress concentration factors at long shallow circumferential grooves in, 41
Shape, chord gauge measurement of, 118–22
SHAPE IMPERFECTIONS IN CYLINDERS AND SPHERES: THEIR IMPORTANCE IN DESIGN AND METHODS OF MEASUREMENT, *Paper*, 117
Shear deflection correction factors, 89
Shells, stress concentration around cutouts in, 53
Ship plating, quality standards in, 153
Ship structural design, allowance for imperfections in, 153
Shipbuilding, structural reliability in, 154
SHRINKAGE STRESSES IN A THIN PLATE WITH A CENTRAL WELD, *Paper*, 140
Shrinkage, weld. *See* Weld shrinkage
Significance of fatigue, *Book*, 252
SOME FINITE-ELEMENT STRESS ANALYSES OF SIMULATED DIFFUSION-BONDED LAP JOINTS, *Paper*, 331
Spheres, shape imperfections in, 117
Stability analysis for laminated plates, 92
STATIONARY CREEP PREDICTION FROM MODEL TESTS USING REFERENCE STRESSES, *Paper*, 271
Stationary hinges, collapse mechanisms involving, 317
STATISTICAL APPRAISAL OF THE MEASURED DEFORMATIONS IN SEVERAL STEEL BOX GIRDER BRIDGES, *Paper*, 97
Steels, Cr–Mo–V, high temperature cumulative damage for stage I crack growth, 253
Steels having preferred-orientation, stress measurement on, 62
Steels, quenched and tempered alloy, influence of mean stress, 81
Stiffened cylinders, welding imperfections in, 134
Stiffened panels, distortions in, 107
Stiffened panels, residual stresses in, 107
Stiffened panels, welding imperfections in, 134
Stiffener measurements in steel box girder bridges, 99
Stiffeners, cold-bent, 132
Stiffeners in steel box girder bridges, 103–5
Storage tanks, ovalization due to foundation settlement, 339
Storage tanks, radial displacement of top, 346
Strain concentration around notch tip, *J*-integral as measure of, 293
Strain distribution and elastic-constant measurement using holographic and speckle-pattern interferometry, *Communications*, 163
Strainsert universal flat load cell, *Product review*, 351
Stress analysis, computing developments in experimental and numerical, *Book*, 68
Stress analysis of diffusion-bonded lap joints, 331
Stress concentration factor in welded joints, 16
STRESS CONCENTRATION FACTORS AROUND THE INTERSECTION OF TWO CYLINDRICAL HOLES IN AN INFINITE ELASTIC BODY, *Paper*, 217
STRESS CONCENTRATION FACTORS OF SHALLOW GROOVES IN TORSION, *Paper*, 41
Stress crack geometries, finite-element and experimental studies, 208
Stress fields around cracks, 293
Stress fields, crack extension forces in elasto-plastics, 305
Stress fields, fatigue crack propagation in biaxial, 23
Stress function under torsion, 43
Stress intensity factor, accuracy of, 288
Stress intensity factor, compendium of, *Book*, 67
Stress intensity factor, determination of, 18, 287
Stress intensity factor, estimation of, 22
Stress measurement on steels having preferred-orientation, 62
Stress–strain law, 79
Stress–strain relationships for compression of non-circular prismatic blocks, 310
STRESSES AROUND A SMALL CIRCULAR CUTOUT IN A CYLINDRICAL SHELL SUBJECTED TO ASYMMETRIC BENDING, *Paper*, 53
Stresses in welded joints, effect of overlay, 16
Stresses, residual, effect on ductile strength of plane welded grillages and of ring stiffened cylinders, 130
Stresses, residual, in Milford Haven bridge, 123
Stresses, residual, in stiffened panels, 107
Stresses, residual, weld shrinkage, 140
Stresses, shrinkage, in thin plate with central weld, 140
Structural engineering, analytical methods in, *Book*, 66
Structural reliability in shipbuilding, 154

Tensile testing machine, *Product review*, 69
Testing machine, *Product review*, 69
Thermal stresses, mechanical analogue procedure for, 37
THIN ANNULAR PLATES HAVING AN INNER CARRYING BENDING MOMENTS, *Paper*, 192
Torsion-control charts, 233
Torsion, stress concentration factors at long shallow circumferential grooves in shafts under, 41
TORSIONAL BUCKLING AT THE LIMIT STATE OF COLLAPSE IN BRACED MULTI-STOREY I-SECTION STEEL COLUMN DESIGN, *Paper*, 233
Torsional critical moment, corrections to, 244
Travelling hinges, collapse mechanism involving, 323
Tubes, collapse of thin-walled, under axial compression, 317
TYPE 1 ENERGY ANALYSIS FOR THE CREEP OF SMOOTH CIRCULAR PIPE BENDS UNDER COMBINED IN-PLANE BENDING AND INTERNAL PRESSURE, *Paper*, 1
TYPE 2 ENERGY AND BOUND ANALYSES FOR THE CREEP OF SMOOTH CIRCULAR PIPE BENDS UNDER COMBINED IN-PLANE BENDING AND INTERNAL PRESSURE, *Paper*, 8

USE OF THE C^* PARAMETER IN PREDICTING CREEP CRACK PROPAGATION RATES, *Paper*, 167

Variable stiffness method of column design, 233
Velocity discontinuity lines for compression of non-circular prismatic sections, 310

Weld shrinkage actions on residual or locked-in stresses, 133
Weld shrinkage, residual stresses caused by, 140
Welded joints, stresses in, effect of overlay, 16
Welding, distortion due to, 148
Welding, residual stresses during, 130

X-RAY STRESS MEASUREMENT ON STEELS HAVING PREFERRED-ORIENTATION, *Paper*, 62

Yield. *See* Fracture, post-yield
